## PROFILE

Innovative and Experienced **Product Manager and Digital Product Specialist with over 6 years** of experience in managing designs, engineering, testing, and the development of digital products both **in India and the UAE**. I have coordinated multiple activities with an Agile mindset, including training and installation of immersive technology stalls. Skilled in product design and management, I have led end-to-end product designs for three key projects — **RISE DiShA, MedSIM 2.0 and Accelerated Learning Program (ALP)** — with over **USD 1 million** in combined funding from international and national institutions such as the **USAID and Ministry of Electronics and Information Technology, India**. Additionally, I was an Organizing Committee Member for the **Civil 20 India 2023 Education and Digital Transformation Working Group**, which is part of the **G20 initiative**.

## PROFESSIONAL EXPERIENCE

### Project Engineer • Apr/2022 - Present

The Amrita Center for Research in Analytics, Technologies & Education (AmritaCREATE), Kerala, India

- o **Managed** a cross-functional team of 6, overseeing stakeholder communication and product development, from inception to a successful launch of a revamped mobile app in 5 sprints.
- o **Acted as a liaison** between stakeholders, conducting follow-ups, prioritizing tasks, and integrating development features to balance stakeholder needs and project deadlines.
- o **Implemented** the Agile Scrum framework, defining product roadmaps, writing user stories, and conducting Scrum ceremonies while managing projects using Azure Boards.
- o **Designed and managed end-to-end** responsive web applications for **4 healthcare projects** from wireframe to prototypes, coordinating between clients, development teams, doctors, SMEs, and multimedia teams.
- o **Developed** highly engaging **UIs for VR** applications and a **3D simulation** using Unity 3D and WebGL, ensuring immersive experiences and optimal performance.
- o **Designed and oversaw VR demo stalls** and conducted training sessions for students, doctors, and practitioners, enhancing educational experiences through interactive VR demonstrations.

### Research Center Activities

- o **Managed** data and **coordinated** projects, **recruiting** participants and **mentoring** faculty, colleagues, and students on immersive reality device usage.
- o **Delivered** training sessions, and **assisted** international delegates with research studies conducted at the company.
- o **Represented the company** at national meetups and project review presentations, showcasing achievements and building industry connections.
- o **Estimated** projects, **planned** resources, **hired** staff, and **monitored project execution**, ensuring optimal resource management and team assignments.
- o **Crafted patent illustrations** and managed documentation for clarity, consistency, and accessibility, supporting effective project communication.
